PÊŞGOTÎN

A: BERHEVKÎRINA PEYVÎKAN

Beşê pêşîn (Kurdî-Îngîlîzî) bi lêkolîneke li ser 300 pirtûk, kovar û rojnameyên Kurdî hat pêkanîn. Vê xebatê îmkana berhevkirina li dor 15.000 peyvikên Kurdî da min. Min dûre peyvikên ku min ji axaftinên Kurdî berhevkiribûn bi ser vekir û bi vî awayî hejmaran wan bû li dor 25.000-an. Di gava dudan de min van peyvikan dan ber ên di çend ferhengên Kurdî de, ew bi rêzimanî ji hev anîn û hemberîyên wan ên Îngîlîzî nivîsîn.

Bo amadekirina beşê dudan (Îngîlîzî-Kurdî) min li nêzîkî 50.000 peyvikên Îngîlîzî kola û ji wan nêzîkî 18.000-ên bingehîn hilbijartin. Dûre van peyvikan ji hev hatin anîn û hemberîyên wan ên Kurdî hatin nivîsîn.

Di ferhengê de, ji herdu zimanan bi hezaran biwêj li gel mînakên bikaranînan cûda hene.

Herçiqas di vê ferhengê de ji gişa zaravên Kurdî peyvik hebin jî, bingeha wê li ser Kurmancî ye. Wek ku tê zanîn, ev zarav ji aliyê Pîranîya Kurdên Bakur, gişa Kurdên Kurdîstana Sûrîyê, yê li Sowyet û Lubnanê, û beşek ji Kurdên Başûr ve tê bikaranîn.

B: ELFABE

Ferheng tîpên latînî bi kar tîne. Elfabeya Kurdî ji 31 tîpan pêk tê. Tablo deng û tîpan dide ber hev. Ji ber ku elfabeya Kurdî ji xwe fonetîk e, min ji bo bilêvkirinê tîpên fonetîk bi kar neanîne. Lê belê, hin tîp du dengên dinimînin (temsîl dikin); **aspirated/ên bêhndanê** (ên bêaqsan) û **unaspirated/ên bêhngirtinê** (ên bîaqsan). Bi Kurdî ji van re **dengên cêwî** tê gotin. Ji van tîpan, “**ç,k,p,r,t**” pir girîng in, ji ber ku ew belav in û bîaqsan bilêvkirina deng dikane peyvekeke cihê pêk bîne. Kurdên Sowyetê ji bo her aqsanekî van tîpan tîpeke cihê bi kar tînin. Ji ber tunebûna lêkolîneke kûr û fireh û nenasîya zimanzanên biyanî ya dengên bîaqsan, meriv di derheqê vê babetê de li encamên hevnegirtî rast tê. Ji bo ku ji van dûr bisekinim, min 10.930 peyvikên Kurdî yê bingehîn (72.521 tîp/deng) ji hev anîn (analîz kirin), di vê ferhengê de, min encamên vê xebatê jî bi grafîk û tabloyan pêşkêş kirine. Ew pîrcarîya (freqansa) tîp/dengên Kurdî, qêsa dengên **bîaqsan**, hwd. didin. Ji bo ku ez bilêvkirineke baş bidim û peyvikan tevlihev nekim, min ji bo **bîaqsan** xwendina dengên tîp **bînxet** kirin. Bi vî awayî, min xwest ez cûdatîya peyvikên wek “**ta** f temperature, fever” û “**ta** m thread”, “**ço** m rod, stick” û “**ço** int used for a donkey to move”, “**ker**” n donkey û “**ker**” adj deaf, “**pir** f bridge” û “**pir** adj much, many, very”, hwd. jî bidim xuyakirin. Ji ber vê yekê, divê tîpên **bînxetkirî** (ç,k,p,r,t) wek **bîaqsan** bilêvkirina wan tîpan bê fahmkirin, ne wek tîpên cûda. Cihêbûna herdu aqsanên tîpa **r** ew e ku **r**-ya **bîaqsan** tê gindêrkirin. Sedema ku di hin nivîsarên Kurdî de ev deng bi du **r**-yan (**rr**) tê nivîsîn jî ev e. Lê belê, ji ber ku **ducarkirin** û **gindêrkirina** dengê ne eynî tişt e, nîşankirina vê tîpê yê ji ducarkirina wê çêtir be. Wek ku tê zanîn, **r** gava ku tîpa/dengê peyvekeke yê yekemîn be her tim **bîaqsan**

(gindêrkirî) ye û di gelek peyvikan de du r-yên **biaqsan** an jî yeka **biaqsan** û yeka **bêaqsan** li pey hev tên. Ev rastîya bikaranîna vê metodê pûç dîke. Hek em vê metodê bi kar bînin, divê em peyvikên **rê, rêz, berran, piranî, pirreng, pirrû, rêrast, serrîşte, serrû, zêrav, kerelal, qareqar** wek **rrê, rrêz, berrran, pirranî, pirrrreng, pirrrrû, rrêrast, serrrîşte, serrrû, zêrrav, kerrelal, qarreqarr** binivîsin. Divê metodeke ku cihêtîya r-ya **biaqsan** û ya **bêaqsan** armanc bike hevgirtî be. Meriv nikane ji bo hinekan tîpên serbixwe bi kar bîne û guh nede yê din an jî tenê di hinek rewşan de nîşan bike. Di hinek peyvikan de e, h û x wek bi Erebi , û tên bilêvkin. Ev reng bilêvkirina van tîpan hatiye binxetkirin (e, h, x). Ji bo peyvikên ku min di nivîsaran de dîtine û bilêvkirina wan nebihîstine binxetkirin nehatiye bikaranîn. Di hin ferhengên ji aliyê Kurdên li Sowyetê ve çapkirî de, dengên **bêaqsan (aspirated)** hatine nîşankirin, lê belê, ji ber ku armanca binxetkirinê, balkişandina xwendevan bo dengên **biaqsan (unaspirated)** ên ji normalê cûda ye, ferqxistina navbeyna van dengan bi nîşankirina dengên **biaqsan** be, dê pirtir bikêr bê. Gava pêşîn ew e ku meriv biryar bide ku em ê ji bo dengên **biaqsan** tîpên cûda bi kar bînin an na. Hek meriv hejmara dengên bingehîn bide pêş çav (31), meriv bi hêsanî dibîne ku ji bo dengên **biaqsan** tîpên cûda bi kar anîn dê elfabeyeke nepratîk û dijwar pêk bîne. Lê cardin jî bo ferhengzan û kesên biyanî problemeke bilêvkirinê dimîne. Ji ber ku **bêaqsan** bilêvkirina van dengan kêr zêde wek a di zimanên din (Tirkî, Îngîlîzî, hwd.) de ye, ya herî baş ew e ku meriv di ferhengan de bilêvkirina **biaqsan** nîşan bike. Nêrîna ku dengên **biaqsan** pirtir tên bikaranîn çewt e. Dengên **bêaqsan** ji yê **biaqsan** pirtir tên bi kar anîn; di vir de **k** û **t**-ya **biaqsan (unaspirated)** îstîsna ye, ew ji yê **bêaqsan** pirtir tên bikaranîn. Ev yeka pêşiyê li sistemeke li ser bingeha **pircarîya** van dengan digire. Di eynî wextê de nêrîna nîşankirina dengên **bêaqsan** jî ji tune de ne pratîk e. Ji xwe, ji ber ku kesên ji zikmakî bi Kurdî dipeyivin van dengan dinasin, ji wan re tenê nîşankirina bilêvkirina **biaqsan** hewce ye. Sîstema nîşankirinê divê tesîrê li teşeyê (şiklê) tîpan neke, an na ew ê bê mana guhertina elfabeyê. Li gora ku piranîya Kurdan parastina elfabeya xwe dixwazin (ji xêndî pîrsa î û î), divê meriv di vê gavê de ji guhertinan dûr bisekine û wan ji rêxistineke ku ji tune de piranîya Kurmancan temsîl bike re bihêle. Ev yeka yê pêşî li anarşîya elfabê jî bigire. Sedema ku min di vê ferhengê de binxetkirin hilbijart ev e. Binxetkirin ji bo balkişandinê ye û tu têkilîyên wê bi teşeyê tîpan re tune.

C: BIKARANÎNA FERHENGÊ

Di Kurmancî de zayend hene, ji ber vê yekê zanîna zayendan girîng e; ji ber ku ew tesîrê li tewandinên navan dîkin. Wek mînak; **Kurê min**: My son (kur bi ê hatiye tewandin), **Keça min**: My daughter (keç bi a hatiye tewandin). Ji bo alîkarîya xwendevanan, *f* (navê feminine/mê) û *m* (navê masculine/nêr) li gel her navî bi tîpên îtalîk hatine nivîsîn. *n* (noun/nav) nîşan dîke ku nav ji bo herdu zayendan jî tê bikaranîn (wek heval, karker, xwendekar, hwd.) an jî zayendeke wî ye taybetî tune (zayend li gor herêman tê guhertin). Zayenda navên Kurdî di beşê Îngîlîzî-Kurdî de jî hatiye dan, wek mînak: **abdomen anat zik m. m** nîşan dîke ku **zik** nêr e. û meriv dibêje **zikê min**, meriv nabêje **zika min**.

Îzehên peyvikan ên rêzimanî bi tîpên îtalîk hatine nivîsîn. Peyvikên ne Kurdî yê êşkere hatine gotin. Wek: **Ayet fA**, A nîşan dîke ku ew nav ji Erebi hatiye wergirtin.

Kevanek () ji bo peyvên ne mecbûrî hatine bikaranîn. Wek mînak, (ser) **ber jêr bûn**, kevanek didin fahmkirin ku him **ser ber jêr bûn** û him jî **ber jêr bûn** tê bikaranîn. Kevanek ji bo îzehan jî tên bikaranîn. Wek, **demsal** fseason (of a year). Raweya Fermaî di kevanekên li pey lêkeran de hatiye nivîsîn. Ev dê ji bo kişandina Dema Niha jî alîkarîyê bide xwendevanan. Wek mînak, di **çûn** (biçe) de, **biçe** fermaîya lêkera **çûn** e.

Nîşandeka (/) ji bo peyvên alternatîf hatiye bikaranîn. Wek mînak, **bi rê ve/va**, nîşandek tê maneya ku him **bi rê ve** û him jî **bi rê va** tê gotin.

Nîşandeka (~), ji dêvla peyvika bingehîn tê bikaranîn. Wek mînak, di îzehên **hestî** de, hun ê ~**yê bazinê dest**, hwd. bibînin; ew tê maneya **hestîyê bazinê dest**. Ji ber cûdabûnên bilêvkirinên herêmî û nebûneke standarda bilêvkirin an rastnivîsînê, hin peyvik bi gelek awayan tên nivîsîn, wek **şikandin**, **şikemandin**, **şikandin**. Ji bo ku kêmtir cih bigire ji wan îzêha yekê tenê hatiye kirin, yên din xwendevan dişînin a bi îzeh. Wek mînak, **şikandin** see **şikemandin**. **şikemandin** (bişikîne) vt break.

Yekî û **tişteki** tewandinên **yek** (kesek) û **tişte** in. Di vê rewşê de nav û cînavên tewandî (min, te, wî, wê, me, we, wan) li dewsa wan tên bikaranîn. Wek mînak, **xew(a yekî) hatin** vi be/feel sleepy. **Xewa min/Zelalê tê**. I am/Zelal is sleepy.

Rengpîşe/pêşlêkerên “**jê, lê, pê, tê**” kurteyên **ji wî/wê** an **ji yekî/tişteki**, **li wî/wê** an **li yekî/tişteki**, **bi wî/wê** an **bi yekî/tişteki**, **di wî/wê** an **di yekî/tişteki** ne. Di zîmanê Kurdî de ew pir girîng in, ji ber ku pir belav in û pirê caran maneya lêkerê ya bingehîn diguherînin. Di vê ferhengê de bi girîngî li ser wan hatiye sekinîn. Wek mînak: **kirin** (**bike**) vt 1 do. **Te çi kir?** What did you do? 2 put (in/into). **jê** ~ vt 1 cut. 2 break off, tear off. 3 undress. **Min kinc ji pitikê kir**. I undressed the baby. **lê** ~ vt 1 write. 2 put up (a wall, etc), build. 3 dress (sb), clothe (sb).

Di Kurdî de, gelek caran ji dêvla rengdêran raweya xwedîtî tê bikaranîn. Ji bo navên binavkirî di raweya xwedîtî de sê paşpirtik hene: **yê** (ji bo navên nêr û yekejimar), **ya** (ji bo navên mê û yekejimar) û **yên** (ji bo navên pirejimar). Min, ji bo ku kêmtir cih bigire, tenê **yê** bi kar anîye; di vê xwendekar bizanibe ku ev her sê paşpirtik gora zayend û pirejimar an yekejimarbûna nav pev tê guhertin. Hek nav bi tîpeke bêdeng biqede tîpa **y** nayê bikaranîn. Wek mînak: **manual** rgd yê dest. ~ **labour** karê dest.

Sernivîsên wek (¹²³, hwd.), peyvikên cûda yên wek hev tên nivîsîn nîşan dîkin.

Gelek îzeh bi hejmaran, wek **1,2,3**, hwd. hatine parve kirin. Ew mane an bikarhatinên peyvikan ên cûda nîşan dîkin.

D: SÎPASDARÎ

Gelek sipas ji Songul, Ertugrul, Yildiz, Jonathan, Paul û Umut re, ji bo piştgirî û alîkarîya wan a hin karên teknîk û pratîk.
