

Elmatu

the ancient civilization of the Kurdistan

Written by Azad Karimi

I decided to disclose this issue as well. Because the time has come.

Until last week, I insisted on not revealing this about ParsePolis, but I thought I would mention a fact that has confused archaeologists and linguists until now. Of course, I already knew what was going on by translating the names of some Elamite kings, and to be honest, I didn't decide to tell it so soon, but the recent events in the world made me think of this issue.

Elam or Alamtu means Dualla, Dually, Dalu, Luda, Duawa, Awdu, Awtuy(Fareidun Shah's father), and Diala.

Alatu, Alashu, Hallshu, Alamut, Tiale, Aali-Ti and Aali-Pi, Aaripi, Arimi, Marii, Arimi, Arini, Narii, Namari, Nairi, Arunayi.

Diaara, Aaradi, Aardiya, Ardawan, Ardini, Dariwa, and Pariwa are also in this category. Alamtu also means ploughman.

It means farmer. They are Lulupi or Palouii. Lulupi or Paluui are the ancestors of Goran Kurds.

Pakurr, Arpak, Kabra, Gawra, Apaktar, Abakard, Gabarda, Bakarda, Tarkapa, Targawa, Targawar, or Bactrian camel is the symbol of the planet of Uranus, and Alalus is the king of the heavens. He is Kumarbi's father. The symbol of the Tulipa flower or Lulipa and Lawlaw belongs to him. Luli-Pa or Paluui or Aluyi, Qaalaawi, Allki, Uallki, Allkallu, and Qalayi(Tin metal)means him.

Alalus is the first characteristic of the Hittite civilization. Therefore, the tablets of Persepolis are written in the ancient Paluian or Pahlawi language. So I removed the mask about this issue. I hope these panels will not be destroyed by the Iranian regime.
