

Gautar, The juicy stone, The particle of creation

Written by Azad Karimi

I think I have said before about the particle of creation of Frmesk, Farmej, Parmesh, Tarmig, Ermig, Gimri, Tarmj or Tarmg, Charmg. But I decided to write more about it.

Its translation is wet fog or watery fog. This particle contains Carbon and water. Because its name tells us this. Smoke is characteristic of carbon and water is characteristic of humidity. There is the Oxygen element in smoke and water. So the interface between water and smoke is oxygen. But smoke has carbon and water has hydrogen.

Therefore, the composition of this particle consists of three elements: Oxygen, Carbon, and Hydrogen...that is, alcohol, and alcohol or May is the source of oxygenated organic substances. So Frmisk is a drop of alcohol.

Frmesk is "wet" because it contains water, and because it contains oxygen, hydrogen, and carbon, it is vaporized. In Kurdish, steam is called "Hallm" and when it cools down, it turns white and is called "Mj" or "Msh".

The guardian deity of "moisture" is the deity of Haana, and she appointed a yellow lion named "Zerru" or Golden as its guardian.

The guardian god of Mj is the Izad Nergal or Ashnu. Due to the fact that vapor or steam is mobile and moves, it is called Shna or Shno. Shna also has a sound and this sound is called "Khsa" or "Sikha" and its sign is an arrow or "Tir".

That is Tigran and that is Enlil's cat. Its symbol is the willow tree leaf. Because the willow tree moves without the wind blowing. When a person dies, the Kurds of Yarsani put the corpse in the leaves of a willow tree. It also secretes an aromatic substance called Bi-Mjk.

And it consists of the moisture of Haana water, which means it is sweet, and its smell is the smoke of Nergal, which is Ashnu, and Ashnu has three flavors, which are called Barazan or Three-Boars. The black boar is called Gurni and it

is the symbol of May, and the Izad Kaldi is its guardian. In Avesta, he is called Arkhana or Tarkhana. His plant is Tarragon.

Kaldi or Talkhi means bitter taste. He is the guardian of the vine that grew from the blood of the cow of creation. His symbol is the Scabbard of Sword, Shorran, and Soran. Black grapes is its product. Its symbol is the city wall.

The second boar is called Surin, and it is red in color, and the Izad Khwini is its guardian, and its symbol is a pillar of salt called Kalaa-Khoy. It has a salty taste and salt is its sign. Its symbol is Ake-Rume or Urumak or Sujin and Shushin and Dusin and Javelin and Jawerin. Red grapes are his product. And that is the castle. Ak-Rma or Mar-Aka, Mar-kar is the first ray of sunlight that shone on the earth and ignited the water spring of Tir in Kur-Dilmun, or the land of the moon.

The third boar is called Khushin or Khoshap, and it is white in color, and the Izad of Tashub is its guardian, and its symbol is an ax, and it is Ertosh, Taurish, Treshta, Ardish or Argishti, Ardaj, and Ajdara. White grapes are his product. Its symbol is "Mardas" or the serration of the castle.

You see, all these weapons are made of iron, and iron is called "Aasn" in the Kurdish language, and Asnu or Ahnu or Ashnu is the title of Nergal.

Nergal has a lasso that is tied around his waist and he has put its ring on the neck of three boars or Baraazaan and put an iron bell(Zangi, Zanga, Sanga,

Shanga) on it so that his seal is on the neck of three boars. This lasso is an inspiration for Springers and Commandos. Nergal is known as the "Red-winged Master", "Baall-Sur", "Suraka", "Shuraka", "Surigash", "Shurika", "Suriya", and "Kurisha" because his red hair is caused by iron.

He is Ironman. The bird on his crown is Allmana, Hallmana, and Arwaana. The Arwaana is the cause of the movement of the wheel or Charkh and it is the Karduna, Garduna, and Gardunya. The Arwana, Charkh, Garduna, Karduna, or Karwana (Crown) is above his head and his crown.

Nergal is the Izad, Sargawra, and Gawra(Master) of all people who deal with iron. Machines, engines, ships, airplanes, cars, wheels, farriers or Kutis, weapon makers, and warriors and rangers.

He is the ruler of the constellation Ardino, which is the neighbor of the hunter. He is the ruler of the planet Mars in the solar system. Hookah is his tradition. Because the fire is on his crown, and the smoke from it mixes with the water inside the tank and comes out from an outlet pipe in the form of aHallm or wet steam.

In the Kurdish language, it is called Nergala, which is the same as Nergal.

The bell(Sangi, Shangi, Jangi, Zangi) is a sign of the awakening of the night watchmen, and it is manifested in the dog (Tangi, Taanji, Taaji, Dangi,

Dandi)that barks three times from dusk to dawn. Tarikaan or Dar-Ikan, Shawaan or Du-Shawaan and Dushaan and Paar-Seyan, Parsiyan, Farisyan.

These three "Paaj" or times are the sign of the Shaw-Baan, Chopaan, Shwaana or Shepherd or night watchmen waking up and changing their posts, and the Pious (Sepaaji, Paaseyi, three times worshipers) who are engaged in worship also stay awake until Paar-Shewan and engage in worship.

Nergal is known as Rang-aall or Aarang, Aurang, All, Allin, Arin, or red-face. He is red-faced and red-haired, so his flag is red. The name of his flag is Aalla. Some areas are under his protection, such as Barazan Plain in Orha or Urfa, Allishan, Aarishan, Parishan River, or Qezel Irmak. Nergal is known as Aladar or standard bearer. He is "Bermang" Mawar, Maywar, Mariwa, Mariwan or Eclipse.

Izad Nergal is superior to three other Gods who were very popular and praiseworthy:

1- Izad Khaldi, or Izad Ariini or Ewaara, Talkkhan, Kalakan, Qallkhan, Khalti, Khallat, Talkhi, Kalkhi, Kalhi, Kaldi, Kalduna, Kandula, Kaluwin, Haluwin, Halmana, Alwin, Kalin, Kalan, Warkana, Warzana, Barzaana, Garduna, Kardi, Hardi, Arti, Ardi, Dariwa, Tariwa, Tarikan, Kldi, Karkuk, Qalkhani tribe.

Khalidi is the same iron knife that Mardukh put on the cow's neck and sacrificed it.

2- Khiwini, Shiwini, Hiwini, bread yeast, midnight god or Inimabakhsh, Nuzi, Suni, Nishiwi, Nweshi, Nweji.

3- Argishti, Argoshi, Ardishi, Artishi, Artoshi, Zargoshi, Zardoshi, Pardoshi, or Paarshevi.

In the end, I must add to what I have written above:

Mars next to Venus in the sign of Scorpio means smoke and water in the month of Awan, Wan, Aw-Anu, Aban(22 October- 21 November), the same season as the killing of the sacrificial cow by Mardukh.

Hallm (Ballma, Barmah, Zawlla, Zawlli, Zallm, Mallh, Ballkha, Wallkh, Barkh, Markh, Kallkh, Kalld, Kaldi= Lamb) or Mars in the Girtaw(Tawrig, Tawrij, Suri) moon or Scorpio means struggle and force and death for life Also, by cutting the jugular vein of the sacrificial cow, the hidden secrets of life were revealed and the tree of life, tree of wisdom and wheat grew.

I think I have said several times that while editing the content, I have come across words with the same root as ancient Kurdish words in English, Norwegian, French, and German, which are European languages.

Of course, the Roman language has had an impact on the lands west of the Euphrates, but it has not had an impact on the Zagros. Therefore, the Kurdish scientific texts, which are called the Media language or ancient Magyaa language, were the communication language of the ancient world. Because it

was the language of astronomy, medicine, philosophy, theology, mythology, and chemistry.

Aruna or Hallmana is the Eylu of Eagle is the energy. Hallm is steam and Kar is movement force and Karduna or Garduna, Kalduna is Chariot. Duna means the belt around Saturn, which is a Dawaan or runner. Dawaan is Kar-Duna (Arwanda, Gallwanda, Gallubanda, Lugallbanda) or Horsepower.

Its material manifestation is a Cart-wheel. It has eight feathers because it is in the center of the Pool of Anu, where the Gemstone is located in the sign of Gazduma(Gajduma, Wazduma, Girtab, Batrig, Bardig, Pardiz, Pardis) or Scorpio.

If you look carefully, the Bshsht or Pardis is Paradise in English. Hasht means the number eight and Bahasht means hallway or tunnel.

Pay attention again: the Hallway is a horizontal corridor or a horizontal hole, but if this corridor is vertical, it is called Kun-Raa, Khunraa or Furnace in English.

Kun-Raa means secret way, secret hole. I said earlier that smoke and water are mixed together and pumped out in the form of steam. This is the definition of the spring of the water of life or Duzin and Izad Nergal is its guardian.

In this story, the soul, which was a mixture of smoke and water, came out of the furnace in the form of a Tarrna(plume) or Hallm(steam). This incident happened on the day of Halloween. The Yarsani Kurdish call it Khaawan Kar(Charioteer), and the English refer to it as Halloween, or the departure of the soul from the world of the dead and back to the world of the living, and this is completely true.

Hallway reminds me of Halloween and Hallmaana and Eagle on the Nergal's Crown. Nergal's crown is placed in the sign of Cancer, but the eagle on it is in the sign of Scorpio.

This fiery crown is placed on two horns, these two horns have souls, and Mazda, Azad, Mazda, Duzuma, Dumuzid, Zukhaw, Khamazi, Awaza, Dumas, Mashiakh, and Masi-akh(Earthy Fish) are among his titles, each of which has a meaning in a sign. These two horns are in the sign of Pisces or March or Mars.

It means an offering or a sacrifice, and that title is a lamb, which is the same as Ballkha or March or Mars.

Therefore, the original soul that passed through the two horns or the lamb or Azad and manifested on earth is Halamaana and it is an eagle.

All of these are the same Charkh, Karduna, or wheel that I wrote earlier that is located on the Samarra bowl and is in the Berlin museum. This sign was on the chariot of ancient European Celts.

Also, the Nazis made it their logo and flag with the Hallmana eagle. But why did the Nazis not mention Nergal's fiery crown? Because they formed a Reich instead of an Empire and Hitler wanted to be a ruler and he had no legitimacy to become a king.

German linguists and archaeologists revealed this whole story that I am revealing to you now, they revealed to Hitler ninety years ago. But there was a main obstacle in their way: the Jews... because in this story you got to know the word Parseyi, Sepaari or Pharisee or pious, who worshiped at night.

Their names are mentioned in the Bible and in the biography of Jesus. They were his rivals and according to the Christians, they condemned Jesus and forced the Roman ruler to execute him. Jesus himself was a Jewish rabbi and preacher, but his line of thought was different from the Pharisees. Jesus' beliefs were unconventional and he claimed divinity.

This was not a strange thing because, at that time, Sufi beliefs were prevalent, the foundations of which were the soul and its origin. A few centuries later, the masters of religions declared this topic as blasphemy and atheism and got rid of it forever. But this discussion was a part of the common culture and was not forgotten, and underground sects and religions continued it.

One of the Muslim Sufis named Mansour Hallaj repeated exactly the same claim of Jesus and said I am God. His reasoning was that if my soul is a particle of God's soul, then I am God. But they killed him on the charge of atheism and

disbelief. The religious leaders argued that if this road is not closed, criminals will also commit crimes and argue that God's spirit or God did it. Therefore, the border between the knowledge of good and bad is removed and morality, which is the basis of social order, is destroyed.

But if you pay close attention, almost none of the religions have a clear definition of Satan, and every time they introduce the name of one of the Anunnaki gods as the cause of evil. For example, Nergal, Mardukh, and Haana are introduced as evil agents.

But Nergal is the angel of Ratael, Mardukh is the angel of Michael, Kald(Harut, Ardini) is the angel of Gabriel, and Enlil is the angel of Ezrael, and Haana is the Jophiel.

In this period, the human intellect has reached a stage of awareness that interprets everything based on wisdom, because science has also reached a very high stage of development, and even religion is interpreted based on scientific principles and becomes acceptable.

But Hitler made the wrong use of science, religion, and collective consciousness. He thought that if God had helped him become the leader of a great country like Germany, then he has given him a blank check to do whatever he wanted. He argued that if he is a particle of God's Spirit and God has revealed the secrets of the Spirit to him, then he is the manifestation of God and God. Of course, he was exactly opposite to Abraham, Elijah, Jesus, Hallaj, Moses, and Mani.

They saw this divine life in the ideas of dervishes and simple living and were Chopaan, ShawBaan or shepherds, but Hitler was a criminal and murderous devil who sent millions of Jews and millions of Christians to death, but he had a warm relationship with the Muslim Mufti of Jerusalem because both of them had extreme ideas. And they were evil and anti-human.

They saw life in the death of others and considered death to be the harbinger of eternal life. They had forgotten that life and death have meaning in the concept of time and time is a process. Exactly the same wheel or wheel of Enlil. That is why the soul is allowed to be born seven times and have the chance to be in the process of going through these seven stations...

then join the light of the sun, which is the source of energy in the solar system. All these are equations and it is very complicated, but it is only one way from pre-eternity to eternity and the possibility of immortality. An experience called life.

You are free to call this process a God joke, an Anunnaki riddle, or whatever, but it is the absolute truth.

Nothing is accidental. Because the science of soul and creation clearly says what is the Gautar or particle of creation and where was its location. Its place is on top of the dome, which means the height of existence.

Where God the Creator has access to. Because the deepest point of the dome of existence is located there. But Gutar's nest is located behind the dome and beyond the dome is God the creator and he is the one who had access to this particle. So when we accept Gutar as the origin of creation, then the dome and everything under it is caused by him, and it is like an umbrella above everything, and the one who is under the umbrella never sees the top of the umbrella.

Anyone who likes to think about behind the dome or the umbrella will tire himself because he will not achieve any results. The only way to live right under this dome is to live correctly and lawfully. And that is a moral teaching: think right, act right, and speak right.

This teaching is called Gosha(Gosh in Kurdish is the first drop of milk that is poured into a baby's mouth.

This drop of colorless milk is called colostrum and it is the foundation of human personality) or ethics, which has three pillars or hangers, and it is the three strings of the scales of justice. This scale is the basis of religion.

Baayi means Criterion and the standard for measuring the doctrine is called Pewar, and it is the touchstone, and it is the Sanga(Ganja) or black stone, or the Zanga(bell), which is located at the last point of the dome of the sky, and from its heart the water of wisdom, knowledge, life, and blessings pours.

Gosha means triangle. That eye is the guardian of Anu, and that is the cup of Alalus. This cup is the blood of the sacrificial cow and contains eternal wisdom,

eternal life, and eternal blessing. That point is immortality because behind immortality is the nest of Gautar. And that is the domain of God.
