

# The saddle or “Zin” of scales of justice:

«Ta-Zin-Ta in Jerusalem»

Written by Azad Karimi

Mars with Cupid, 1649... by Guercino

Ashnu is an Izad who has windmills and water mills and rides on a pillar of smoke and fire. In addition to being the ruler of the planet Mars in the solar system, Ashnu is the ruler of the constellation of the charioteer, which is the neighbor of the constellation of Orion. He rules in the bitterness, saltiness, and sour taste of the fountain of life.

These three flavors are manifested in three red, white, and black pigs. The symbol of these three boars and three tastes is manifested in Gurni or grapes, Khuin or salt column, and Turush, or sour, which is bread leaven.

These three flavors are manifested in three red, white, and black pigs. The symbol of these three boars and three tastes is manifested in Gurni or grapes, Khuin or salt column, and Turush, sour or hedge and fence, which is bread leaven.

Ashnu is the favorite god of blacksmiths. Because the name "Asn" is derived from his name Ashnu. He is a symbol of a strong and invincible spirit and will. His weapons are a spear, shield, and sujin or javelin.

These three boars exist in the water of life together with the Ilu or the lion of Izad Haana, which is the manifestation of the sweetness of honey.

Boiling particles of this water are thrown into the air. They are called Tiran or the cat of Izad Enlil.

The boiling and unrest of this water is called Heidjan and it is a spotted leopard of Izad Enki.

The roaring sound of this spring is called Bauran, and it is the striped Tiger of the Izad Mardukh.

Aster or Haana is the ruler of the planet Zarduka or Venus in the solar system and also the ruler of the constellation of Orion. The yellow sign of this planet is manifested in a sitting and calm lion named Ilushirin.

Enki is the ruler of the planet Saturn in the solar system. He is also the ruler of the constellation Gemini or Dugre or Grduya, which is the neighbor of the constellation Orion. Gre-du-ye or Du-gre is two knots means two dots or polka dots and this means the color of the leopard's skin.

Anu is the ruling Izad of the polar star at the top of the sky. He is also the ruler of the constellation Taurus or Dewaar-An, which is the neighbor of the constellation Orion.

Enlil is the ruler of the planet Mercury in the solar system. He is also the ruler of the constellation Lepus or Kawreshan, which is the neighbor of the constellation Orion. Its sign is the face and it is manifested in the yellow-black cat.

Mardukh is the ruler of the planet Jupiter in the solar system. He is also the ruler of the Inke Shukh or Shokha or Monoceros constellation. Its sign is the sound and it is manifested in the Brown-White Tiger.

The set of these six constellations is gathered in a chart called Sag-Atra or the dog standing in a balanced position.

Sag-Atra is now called Sag-Gurtu, Zakartu or Ziggurat.

The Sag-Atra is a symbol of (TaZinTa) or Sushiant's scales of justice. When this code is opened, God's promise about the day of establishing justice and returning to balance in the way of life on earth will be fulfilled.

Today is the day of setting up this scale, and this morning I explained that the base of this scale is in Jerusalem and the hill of the Holy Temple of King David.

The Star of King David on the Israeli flag is the symbol of the planet Venus, whose ruler is Izad Haana. Its white color symbolizes the crystal pool of Anu. Its blue color symbolizes the water of the metaphysical spring of life, which is symbolized by the sacrificial white cow, This cow is a symbol of sacrifice.

Because it was ready to sacrifice its life to save the life of Izad Mardukh who was at risk of drowning in the water of the fountain of life. But with the killing of this cow, life was created on the planet in its current form. In this life, seeing,

hearing, feeling, tasting, and smelling together with speaking and thinking gained meaning.

Its lines are a symbol of Tallit. The tallit is reminiscent of the phoenix.

Its symbol is the planet Jupiter, the planet Saturn, and the planet Earth.

The Izad Enki is the ruler of Saturn. Izad Dumuzid is the ruler of the earth.

The Izad Marduk is the ruler of Jupiter and also the ruler of the constellation Kushukh or the Unicorn. Jupiter also rules the twelfth month of the year, whose sign is Sagittarius. Tallit is the story of the birth of the phoenix, who is the son of Meshiakh and Kimash, and the phoenix restores justice in the life of earthly man with the help of God.

The scales of the phoenix is Sushiant or ZinDuTa. Its base is Zin or saddle and is located in Jerusalem and its dishes are Barzin and Sharzin. Barzin or front of the saddle is in Sazez and Sharzin or behind the saddle is Harran.

The phoenix is God's servant and strives for goodness and improvement of the earth's inhabitants who are God's servants. He is Zaada( born) of a human male and female.

There is Sha-Laa-Yim or Paa-Laa-Wa or the base of the scales. Because the balance of the scales is on it and its meaning is "standing"... in the language of Sangbutis or stonemasons. But its mystical meaning is: "Paa-Rraa-Wa" means the place of prayer and this is absolutely true because that is the place where the Western Wall is located. Therefore, the name of the city of Jerusalem is because of the Western Wall. Also, Paarraawa is synonymous with Parrwa or passage, which means in front of the gate, and that is the title of the great Prophet Abraham. Parriwa is a place in front of the door of the Kur-Dilmun temple... Kur-Dilmun is the land of the Anunnaki gods and the place of human creation.

They are known as the three brothers or three stones(Se-Bardan) of the Kwanu, Nuwak, or oven of Khdr-Elia's house.

Khdr-Elias is the same as Zi Ud Sudra. He is the last king of Kur-Dilmun. He is the son of Shurupak and Shurupak is the son of Gaubaru. They were kings for generations.

The right dish of the scale is Barzin, which is located in turpentine. The left dish is Sharzin, which is located in Harran. The ropes of this scale are the three boars of Ashnu.

Ziggurat of Zagroti or Zagros is the name of a very large mountain in the Middle East where Kurdistan is located.
